

LESSON 101 (2.0) GROUND**Lesson Objective**

During this lesson, the applicant will become familiar with the instructor and applicant relationship and expectations of each. The applicant will become thoroughly familiar with Florida Tech Aviation's Safety Program, Flight Operations Manual and Maneuvers Manual. This lesson will also provide the applicant with an Introduction to the Private Pilot Certification Course, its objectives, content, and completion standards.

Briefing

- Outline the objectives and completion standards of the lesson.
- Establish the student and instructor responsibilities.
- Student questions.

References

- Flight Operations Manual. (Version 9)
- Private Pilot Certification Course Flight Training Syllabus. (Version 5)
- Warrior Maneuvers Manual. (Version 3.0)

Instructor Guidance

- Do not no-show your student on the first lesson. This sets the tone for the entire instructor-student relationship — reliability and professionalism start here.
- Refrain from quizzing or assessing the student during this lesson. The goal today is rapport and familiarity, not evaluation.
- Be engaging and take time to get to know your student. Ask about their background, their goals in aviation, and what brought them to Florida Tech. This information will help you tailor your instruction throughout the course.
- Set clear expectations from the start — both yours and the student's. Be transparent about what the course demands, what punctuality and preparation look like, and how grading works per the syllabus.
- Walk the student through how to access the FOM, Maneuvers Manual, and syllabus on fitaviation.com. Do not assume they will figure it out on their own — show them step by step and confirm they can log in and navigate to the correct documents before leaving the lesson.
- When covering the FOM, do not read through it line by line. Hit the most operationally relevant sections — scheduling, weather minimums, no-show policy, fatigue grounding, and safety reporting — and encourage the student to read the full document as assigned homework.
- Emphasize the safety reporting programs (OMIR, SIR, ASR, Maintenance reports) with genuine importance. Students who understand the purpose of these programs from day one are far more likely to use them throughout their training.
- Once all required line items have been reviewed, give the student a tour of the facility. Include the briefing room, weather room, TOLD card area, practice area overlay, dispatch desk, and the flight line. A student who knows where everything is will feel more confident and prepared from lesson two onward.

- End the lesson on a positive and encouraging note. First impressions matter — the student, informed, and excited about the training ahead.

Lesson Content

Instructor/Student Relationship and Expectations

- Introduction.
- Student expectations.
- Instructor expectations

Safety Program

- Introduce and emphasize the importance of the OMIR/SIR/ASR/Maintenance report programs.
- Show where those forms are located, how to fill them out, and where to deposit them.
- Review ASRS (NASA safety reports).

Florida Tech Aviation Flight Operations Manual (FOM)

- Provide guidance to the student on how to access the FOM.
 - Fitaviation.com → students → forms and internal documents → login with TRACKS account.
 - Omit the “my” in the username. ex: name@fit.edu NOT name@my.fit.edu → manuals.
- Section 1 - Introduction.
 - Scheduling.
 - Attendance
 - Flight Training Administration.
- Section 2 - Technical.
 - Weather Minimums.
 - Avoidance of Other Aircraft.
 - Ramp Operations.
 - Flight Operations.
 - Training Operations.
 - Testing and Certification.
 - Maintenance.
 - Emergency Operations.
- Section 3 - Restrictions and Limitations.
 - Dress Code.
 - Alcohol and Drug Restrictions.
 - Alcohol and Drug Testing.
 - General Flight Restrictions.
 - Towered Airport Operations.
 - Non-Towered Airport Operations.
 - Solo Training Operations.
 - Time Building.

- Instrument Training Operations.
- Night Operations.
- Glass Cockpit Operations.
- Flight Time and Rest Limitations.
- Section 4 - College of Aeronautics Trainees.
 - Payment Method.
 - Duration/Completion of Flight Courses.
 - Grading.
 - Flight Course Failure/Withdrawal.
 - Not Completing a Flight Course.
 - Flight Fee Refund.
- Appendix 1 - SMS and Management Systems.
- Appendix 2 - Simulation Center Operations.

Maneuvers Manual

- Provide guidance on how to access the maneuvers' manual.
 - Fitaviation.com → students → forms and internal documents → login with TRACKS account.
 - Omit the "my" in the username. ex: name@fit.edu NOT name@my.fit.edu → manuals.
- Highlight maneuvers to be performed in stage 1.

Private Pilot Certification Course

- Provide guidance on how to access the syllabus.
 - Fitaviation.com → students → forms and internal documents → login with TRACKS account.
 - Omit the "my" in the username. ex: name@fit.edu NOT name@my.fit.edu → Syllabi → EPPL Flight Syllabus.
- Show the student where to find objectives, content, and completion standards for every lesson.

Post-Brief

- Questions from the student.
- Lesson grading.
- Preview the next lesson → 102.
- Assign homework:
 - Read through the FOM, quiz SP next lesson.
 - Read chapter 10 of the Pilot's Handbook of Aeronautical Knowledge - Weight and Balance.

Completion Standards

This lesson is complete when the student can:

1. Demonstrate an understanding of the information presented by answering the instructor's questions.
2. Demonstrate familiarity with the Flight Operations Manual and Safety Program to include when and how to make a safety report.
3. Demonstrate familiarity with the Private Pilot Certification Course and how to use proper materials to prepare for each lesson
