

Lesson 143 (0.5) Ground (2.0) Cross-Country Solo (3) Landings

Lesson Objective

The applicant will use the previously learned cross-country skills on a solo cross-country flight. This flight will increase the applicant's ability and confidence. Refer to the approved cross-country list handout for recommended routes and airports.

This flight must satisfy the requirements of 14 CFR Appendix B to Part 141 5. (a). The flight must be a minimum of 100 NM with landings at a minimum of three points and one segment of the flight consisting of a straight-line distance of more than 50 NM.

Pre-Brief

- Review homework assigned in the previous lesson.
- Outline the objectives and completion standards of the lesson.
- Review of Cross-Country Pre-Flight Planning.
- Student Questions.

Instructor Guidance

- The student must make a go/no-go decision depending on:
 - Personal Minimums.
 - FIT Minimums.
 - Aircraft.
 - Airspace.
- Review the student's planning with a focus on:
 - Weather, weight and balance, performance, flight planning, and fuel calculations.
 - NOTAMs, TFRs, FIFs, aircraft documents.
 - Discuss runways in use and pattern entry.
 - Review obtaining flight following.
- Look over student documents.
 - Ensure student has all required documents and all are valid.
 - Verify student has all correct endorsements and if required, add endorsements as the flight requires.
 - Discuss FRAT/TEM/safety considerations for the flight.
- Create a plan of action for the student to follow to allow for an efficient flight.
 - Discuss all line items and EMPHASIZE that all line items must be completed in order to satisfy the lesson.
 - If any line items are not completed, the lesson will be incomplete.
 - Go/no-go decision is continuous and should be considered when airborne.
- Stress importance of making radio calls in practice area and non-towered airports when applicable.

- Say "student pilot solo" when applicable.

Lesson Content**Checklist Procedures**

- Student pilot solo.

Preflight Inspection

- Student pilot solo.

Operation of the Communications and Navigation Units

- Student pilot solo.

Engine Starting

- Student pilot solo.

Radio Communication Procedures and ATC Phraseology

- Student pilot solo.

Visual Scanning and Collision Avoidance

- Student pilot solo.

Taxiing

- Student pilot solo.

Normal and Crosswind Takeoff

- Student pilot solo.

Pilotage and Dead Reckoning

- Student pilot solo.

Navigation Systems and Radar Services

- Student pilot solo.

Navigation Log

- Student pilot solo.

Flight Service Station Flight Plan

- Student pilot solo.

Go-Arounds or Rejected Landings

- Student pilot solo.

Normal and Crosswind Landing

- Student pilot solo.

Postflight Procedures

- Ensure that the student conducts a thorough postflight inspection.

Post Brief

- Student self-critique.
- Review ground track to ensure student did all line items.
- Student questions.
- Logbook Completion.
- Schedule and preview next lesson.
- Assign Homework:
 - Ensure student reviews all material learned to date.

Completion Standards

This lesson is complete when the applicant can:

1. Adequately plan and safely conduct a solo cross-country flight.

This flight must be a minimum of 100 NM with landings at a minimum of three points and one segment of the flight consisting of a straight-line distance of more than 50 NM. Upon completion of this flight the applicant must have a minimum of three solo takeoffs and landings to a full stop (with each involving a flight in the traffic pattern) at an airport with an operating control tower.
