

Enhanced Private Pilot Certification Course**LESSON 123 (0.3 GROUND and 0.8 SOLO)****Lesson Objective**

The purpose of this lesson is to continue to enhance the student's confidence and abilities to operate the aircraft during solo flight. This lesson will allow the student time to practice Go-around/rejected landing procedures, normal and crosswind takeoff and landings as well as traffic pattern procedures.

Briefing

- Outline the objectives and completion standards of the lesson.
- Establish the student and instructor responsibilities.
- Student questions.

References

- Airplane Flying Handbook. ([FAA-H-8083-3C](#))
 - Chapter 06 - Takeoffs and Departure Climbs.
 - Chapter 08 - Airport Traffic Patterns.
 - Chapter 09 - Approaches and Landings.
- Pilot's Handbook of Aeronautical Knowledge. ([FAA-H-8083-25B](#))
 - Chapter 14 - Airport Operations.

Lesson Content (Ground)**Solo Briefing to Student**

- Normal and crosswind takeoffs
 - Ask the student:
 - What runway are you expecting to take off from?
 - What direction is the wind coming from and how will you apply correction as a result?
- Traffic pattern procedures
 - Ask the Student
 - What instructions are you expecting after departure?
- Normal and crosswind landings
 - Ask the student:
 - What direction is the wind coming from and how will you apply correction as a result?
- Go-around/rejected landing
 - Ask the student:
 - What situation might cause a go-around?
 - What is the procedure for going around?
 - Perform a go-around if necessary.
 - Unstable approach.
 - Vehicle, wildlife, etc. on the runway.

Enhanced Private Pilot Certification Course**Go/No-Go Decision**

- The student must make a go/no-go decision depending on:
 - Personal minimums.
 - FIT minimums.
 - Aircraft.
 - Airspace.
- Review the students planning with a focus on:
 - Weather, weight and balance, performance, flight planning, and fuel calculations.
 - NOTAMs, TFRs, FIFs, aircraft documents, and personal documents.
 - Equipment requirements (e.g. flashlight, fuel card, drinking water, view-limiting devices, life jackets, fly away kit, survival kit, etc.)
 - FRAT/TEM/safety considerations for the flight.
- While this is represented by one line item prior to departure, the go/ no-go decision is continuous and should be a consideration even once airborne.

Lesson Content (Solo)**Normal and Crosswind Takeoffs**

- Student pilot solo.

Traffic Patterns

- Student pilot solo.

Normal and Crosswind Landings

- Student pilot solo.

Postflight Procedures

- Student pilot solo.

Post-Brief

- Student self-critique.
- Lesson grading.
 - With dispatch.
- Logbook completion.
 - Description of activities input by student.
- Schedule the next lesson.
- Preview the next lesson → 124.
- Assign homework:
 - Read chapter 06 of the Airplane Flying Handbook - Takeoffs and Departure Climbs:
 - Short field takeoffs.
 - Soft field takeoffs.
 - Read chapter 08 of the Airplane Flying Handbook - Airport Traffic Patterns:
 - Short field landings.
 - Soft field landings.

Enhanced Private Pilot Certification Course

- Read chapter 05 of the Pilot's Handbook of Aeronautical Knowledge - Aerodynamics of Flight
 - Wingtip Vortices.

Completion Standards

This lesson is complete when the student is able to:

1. Execute a local solo in accordance with all FIT, FAA and local procedures and regulations.
